ACADEMIC PROJECTS

Banking Analytics Data Pipeline & Dashboard | Databricks, PySpark, SQL

- Designed and implemented an end-to-end real-time banking analytics solution utilizing Medallion Architecture.
- Developed automated ETL pipelines with Spark Declarative Pipelines to process real-time transaction data efficiently.
- Implemented Delta Lake tables, incorporating ACID transactions and time-travel capabilities.
- Engineered dimensional models, fact tables, and materialized views to support loan and transaction analytics.
- Built and deployed executive dashboards via Lakeview to visualize KPIs and derive business intelligence.
- Managed data governance, lineage, and access controls using Unity Catalog.

Library Management System | Python, SQL

- Designed and normalized a relational database schema for inventory management.
- Developed Python-based CRUD operations to handle complex borrowing and inventory workflows.
- Optimized SQL queries to improve data retrieval speeds and maintain system integrity.
